

## **COVID POLICIES & PROCEDURES**

During the past few months policies and procedures have been put into place to ensure the health and safety of our students, staff and parents. We cannot eliminate all of the risks, but we can limit them by ensuring that we adhere to all Center for Disease Control and Department of Public Health policies.

Our facility has been totally cleaned and disinfected with an EPA approved disinfectant and will be continued to be cleaned by our staff and custodian.

Upon arriving at the school, parents will only be permitted in the vestibule where a questionnaire needs to be completed and temperatures of students will be taken. Children will wash their hands in the classroom upon arrival and dismissal.

Staff has been provided with masks, gloves, face shields and smocks. Masks are recommended for three and four year olds and highly recommended for five year olds.

Due to current State of Delaware regulations, contractors are not permitted into the facility, therefore we will develop virtual instruction in Chinese, Yoga and Music. Library and Art will be offered in house. Field trips and after school electives will be cancelled until further notice.
